## Table of Contents

| Chapter                                | Page Number |
|--|-------------|
| 1 Introduction                         | 1           |
| 2 Basic Concepts                       | 13          |
| 3 Directed Graphs                      | 20          |
| 4 Connectivity and Paths               | 27          |
| 5 Trees                                | 30          |
| 6 Cut-sets, Cut-vertices and Matchings | 39          |
| 7 Colouring of Graphs                  | 46          |
| 8 Planar Graphs                        | 50          |
| 9 Matrices and Vector Spaces of Graphs | 53          |
| 10 Networks                            | 60          |
| 11 Special Graphs                      | 64          |
| 12 Select Graph Algorithms             | 77          |
| 13 Miscellaneous                       | 92          |
| 14 End Matter                          | 103         |
