| Chapter                                     | Page Number |
|---|-------------|
| 1 Number Systems                            | 1           |
| 2 Binary Codes                              | 9           |
| 3 Boolean Algebra                           | 17          |
| 4 Logic Gates                               | 25          |
| 5 Function Minimization                     | 34          |
| 6 Combinational Circuits                    | 44          |
| 7 Sequential Logic                          | 72          |
| 8 Registers and Counters                    | 92          |
| 9 Arithmetic and Data Transfer in Registers | 111         |
| 10 Logic Design in Processor                | 121         |
| 11 Control Logic Design                     | 130         |
| 12 Design of Computer System                | 138         |
| 13 Miscellaneous                            | 141         |
| 14 End Matter                               | 149         |
