

## Table of Contents

Lecture No	Contents	Page No
01	Introduction; History; Benefits of SQL; Database access; SQL versus high level language; SQL for business requirements; Initiatives by IBM; Initiatives by Microsoft; SQL integration with Java; Exercises	6
02	Relation; Relational model; Introduction to MySQL; Advantages of MySQL; Some applications of MySQL; Some remarks; Disadvantages of MySQL; Exercises	10
03	Downloading MySQL Installer; Connecting to MySQL using shell; Connecting to MySQL server; Exercises	15
04	Activating MySQL Workbench; MySQL Workbench features; Some SQL statements; CREATE DATABASE, USE DATABASE, CREATE TABLE, SELECT statements; Exercises	19
05	Data / attribute; Database schema; Key; Constraints; AND, OR, NOT operators in SQL; Exercises	25
06	SELECT DISTINCT statement; ALTER TABLE, CHECK on TABLE; BETWEEN, LIKE and IN operators; ORDER BY clause; NULL value; Exercises	29
07	LIMIT clause; MIN () and MAX () functions; COUNT (), AVG () and SUM () functions; % wildcard; Aliases; Exercises	33
08	Join, cross-product operations; Equijoin (inner join) operation; Outer join operations; Defining EmployeeDB; Exercises	36
09	Data entry; JOIN operations; Self join operation; GROUP BY, HAVING clauses; Exercises	39
10	EXISTS operator; Top k query; Nesting of queries; Comments; ALL operator; ANY operator; EXCEPT vs NOT IN; Exercises	43
11	SalesDB creation; delete statement; update statement; alter table; union operator; drop table; Exercises	47
12	CASE statement; UNIQUE constraint; Default constraint; AUTO INCREMENT field; DROP DATABASE; Exercises	53
13	CREATE VIEW statement; DROP VIEW statement; Stored procedures; Stored procedures with input parameters; Stored procedures with output parameters; Stored procedures with local variable; Exercises	56
14	Stored functions; Grant/revoke privileges; create index statement; Exercises	59
	<b>Appendix A: More SQL queries</b>	61
	<b>Index of Keywords</b>	67
